"Why not? .If. Getting inside would therefore require some men being moved right up to at least one of the security points without arousing suspicion-armed men at that, since they would be facing armed guards and could hardly be sent in defenseless. Malloy had again discouraged ideas of attempting to impersonate SD's. The only alternative came from Armley-a bluff, backed up with information manufactured by Stanislau, to the effect that regular troops were being posted to guard duties inside the complex as well as SD's, and providing reliefs from D Company. Obviously the plan had its risks, but making three separate

attempts at the three entrances simultaneously would improve the chances, and it was a way of getting the right people near enough. In the end, Sirocco agreed. Once they got that far it would be a case of playing it by ear from there on, and the biggest danger would be that of SD reinforcements arriving from the guardroom behind the main doors of the Government Center complex, which was just a few hundred feet away on the same level, before the situation was under control. That was the part that Bernard Fallows had come along to handle. Leilani said, "One reason I know she hates Luki more than me is the name she gave him. She says she's diner, gift shop, and according to one highway sign glimpsed earlier, a "full range of services," whatever. Half the Army seemed to have converged on the west gate, where a group of escapees had been run to ground and were shooting it out. When the confusion was at its peak, a series of thunderous explosions blanketed the Detention Wing and the depot with smoke. When the smoke cleared, one of the transporters was gone. No one had been guarding the motor pool. She knocked again. so full of life. And you still are everything you were then. None of it's lost forever. All that promise, all." "I don't know. It depends on the situation. Maybe. That's something else we'll have to leave to Sirocco to decide." "Sounds great. I will. How do I get directions--from the net?" cowboy boots. "Now," says Donella, "before I take your order, honey, are you sure you've got the money to pay?" are tall, made taller by their Stetsons. Both wear their blue jeans tucked into their cowboy boots. Colman narrowed his eyes, barely conscious of the jealous mutterings behind him. "Well . . . sure," he said cautiously. "If it wouldn't be any trouble to anyone. You must have talked to the two guys who were here earlier." "Luck," Micky clarified. "The angle of the shot was severe. The slug literally ricocheted off her skull." "What a perfectly appropriate word? raw." locked. He rattles it up and down, up and down, insistently, to no effect. of a predator, it couldn't have been scarier if it had been a massive python or a full-grown rattlesnake. have initiated hostilities. And the two men wouldn't resort to violence so immediately if they weren't. remote control. They're most likely fast approaching from the other side of the vehicle. "Half of me," Leilani conceded, "might turn heads one day, but that's balanced by the fact that I'm a. Later. Tears are for later. Survival comes first. He can almost hear his mother's spirit urging him to. "Very good," her mother said. Who're you running from, boy? "Pretty good. The axle assembly's finished. You'll have. Returning to her chair, Geneva said, "So, Micky, will we all be getting together for a neighborly. Chiron's surface had been formed through the same kind of tectonic processes as had shaped Earth's, and Chironian scientists had reconstructed most of its history of continental movements, mountain-building, sedimentation, vulcanism, and erosion. Like Earth, it possessed a magnetic field which reversed itself periodically and which had written a coherent story onto the moving seafloors as they spread outward and cooled from uplifts along oceanic ridges; the complicated tidal cycle induced by Chiron's twin satellites had been unraveled to yield the story of previous epochs of periodic inundation by the oceans; and analysis of the planet's seismic patterns had mapped its network of active transform faults and subduction zones, along which most of its volcanoes and earthquake belts were located. night. Laughing softly, shaking her head, Micky said, "Kid, you've pushed this Addams Family routine one. The transport swings into a wide space between two huge trucks. CHAPTER THIRTY-ONE. Lechat stared at the Director's seat next to him, and while he was still turning his head perplexedly from one side to the other, the first approving murmurs and ripples of applause began coming from among the members and one by one they realized what it meant. The applause rose to an ovation as at last Lechat, looking a little awkward but with a broad smile breaking out across his face, stood up again and moved to stand before the Mission Director's seat, which under the emergency proviso had become his automatically. Wellesley had wanted it so, even if Lechat's term of office would be measured only in minutes. A currency was introduced and declared the only recognized form of tender. All goods brought into Phoenix were subjected to a customs tariff equal to the difference between their purchase cost and the prevailing price of Terran equivalents plus an import surcharge, which meant that what anybody saved in Franklin they paid to the government on the way home. Terran manufacturers thus lost the advantage of free Chironian materials but gained a captive market, which they needed desperately since their wares hadn't been selling well; and the market could be expected to grow substantially when the whole of Franklin came to be annexed, which required no great perspicacity to see had to be not very much further down Kalens's list of things to bring about. The Terran contractors and professionals were less fortunate and raised a howl of protest as Chironians continued cheerfully to fix showers, teach classes, and polish teeth for nothing, and an additional bill had to be rushed through making it illegal for anyone to give his services away. In response to this absurdity the skeptical Terran public became cynical and proceeded to deluge the courts, already brought to their knees by Chironians queuing up in grinning lines of hundreds to be arrested, with a flood of lawsuits against anyone who gave anyone a helping hand with anything, and a group of lawyers' wives staged their own protest by drawing up a list of fees for conjugal favors. "If I could, I'd make you normal just like Ms. Donella and me." victims? provided each of 'em with a room and a boyfriend. Anyway, who knows where any of those guys are. This is the largest truck stop the boy has seen, complete with a sprawling motel, motor-home park, has been his companion for the past hour, as he's traveled twisting trails through exotic underbrush. Bernard grinned. "It takes some getting used to, doesn't it? I think we've been shut up in a spaceship for so long that we've forgotten what on-planet life was like." whole army behind me, what can a rabble of ruffians with handguns do to stop me now? "They're dead serious about it. He says if we tell anyone about them, they'll never bring Luki back. They. Three obstacles now remained between Kalens and the vision that he had nurtured through the years of presiding over the kind of neofeudal order that would epitomize his ideal social model. First there was the need to ensure his election to succeed Wellesley; but Lewis was coordinating an effective media campaign, the polls were showing an excellent image, and Kalens was reasonably confident on that score. Second was the question of the Chironians. Although he would have preferred Borstein's direct, no nonsense approach, Kalens was forced to concede that after six years of Wellesley's moderation, public opinion aboard the Mayflower II would demand the adoption of a more diplomatic tack at the outset. If diplomacy succeeded and the Chironians integrated themselves smoothly, then all would be well. If not, then the Mission's military capabilities would provide the deciding issue, either through threat or an escalated series of demonstrations; opinions could be shaped to provide the justification as necessary. Kalens didn't believe a Chironian defense capability existed to any degree worth talking about, but the suggestion had potential propaganda value. So although the precise means remained unclear, he was confident that he could handle the Chironians. Third was the question of the Eastern Asiatic Federation mission due to arrive in two years' time. With the first two issues resolved, the material and industrial resources of a whole planet at his disposal, and a projected adult population of fifty thousand to provide recruits, he had no doubt that the Asiatics could be dealt with, and likewise the Europeans following a year later. And then he would be free to sever Chiron's ties to Earth completely. He hadn't confided that, part of the dream to anyone, not even Celia. mishap and calamity, she had added supplies to the basic kit. She kept it always near at hand.
