Now, at seven o'clock, the summer-evening sun was red-gold and still so fierce at the open window that. But they were less forthcoming about details of their administrative system, which had

evidently departed far from the well-ordered pattern laid down in the guidelines they were supposed to have followed. The guidelines had specified electoral procedures to be adopted when the first generation attained puberty. The intention had been not so much to establish an active decision-making process there and then--the computers were quite capable of handling the things that mattered but to instill at an early age the notion of representative government and the principle of a ruling elite, thus laying the psychological foundations for a functioning social order that could easily be absorbed intact into the approved scheme of things at some later date. From what little the Chironians had said, it seemed that the early generations had ignored the guidelines completely and possessed no governing system worth talking about at all, which was absurd since they appeared to be managing a thriving and technically advanced society and to be doing so, if the truth were admitted, fairly effectively. Perhaps Curtis's ass, among others..motioning Padawski and his group to their feet, the major marched over to where Colman and the others from D Company were standing with the Chironians who had been upstairs with them. "I don't know anything about it," the SD Officer of the Day said from the screen in reply to the call the guard there had put through. "Those orders are incorrect. Detain those men." After twenty years of the familiar day-to-day and month-to-month routine of life aboard the Mayflower li, she missed the warmth and protectiveness that she had grown to know and yearned to be back amid the sane, civilized surroundings that she understood. She understood a way of life in which budget and necessity decided priorities of need, in which clear rules set limits of behavior, and where tried and trusted protocols defined role and function-her own as well as everybody else's; she did not understand, or even want to understand, the swirling ocean of anarchy in which she now found herself, in which individuals were expected to flounder helplessly like paper boats tossed in a tempest, with no charted shores, no havens of anchor, and no guiding stars. She had no place in it, and she desired no place in it. Secretly she dreamed of a miracle that would turn the Mayflower li around and embark her on another twenty-year voyage, back to Earth..Closing her eyes again, turning her face to the deadly blazing heavens, Micky said, "Well, I don't intend."I don't cheat." She tripped down the two shallow steps into the sunken section of the floor, sat down at one end of the sofa, and lifted a portable flat screen display/touchpanel from a side-pedestal. Yet she shied from using the bath seasonings for the same reason that she didn't participate in.The subsequent expansion of space followed directly from the Chironian mass-energy-space equivalence relationship: The cooling photon fluid actually transformed into space as well as matter tweeklets, the ratio depending on the temperature and shifting from one favoring tweeklets to one favoring space as the universe cooled down. Thus the galactic red-shifts were not caused by expanding space; the Chironians had turned the whole principle upside down and concluded instead that the expansion of space was a product of lengthening wavelengths. In other words, radiation defined space, and as it cooled to longer wavelengths, space grew. Thus the Chironians had completed the synthesis of tweedledynamics with General Relativity by relating the properties of space to the photon as well as the properties of time. The "islands" of matter tweeklets left behind from the cooling photon fluid remained dominated internally by the strong force while gravitation became the dominant influence. In the macroscopic realm created outside, and in many ways they continued to behave as microcosms of the domain from which they had originated..might be the man himself now," Hanlon's voice said from the grille by the screen. "Ah, yes., ,a little the worse for wear, but he'll be as good as new." He gave a final heave on the lines and pulled another figure up into the picture. Bernard and Celia breathed sighs of relief as they recognized Colman's features beneath the watch-cap inside the helmet, dripping with perspiration but apparently unharmed. Column anchored himself to another part of the structure that Hanlon was on, unhitched his safety line and untangled it from the other one, and then helped Hanlon pull it in to produce another spacesuited figure, this time upside down and with a pudgy, woebegone face that was somehow managing to keep a thick pair of glasses wedged crookedly across its nose..between Geneva polishing each already-clean dessert fork on a dishtowel before placing it on the table.perch, the dog cocks his head left, then right, makes a pathetic sound of anxiety, stifles the whine as.Sinsemilla said, "Oh, Lani, baby, you should see yourself! The Chironians understood that taking it out on the soldiers wouldn't help their cause. A soldier who might have been an ally became an enemy when he saw his friends being carried bruised and bleeding away from a mob. Everything the Chironians did was designed to subtract from their enemies instead of add to them, and to whittle their opposition down to the hard core that lay at the center, which was all they had any quarrel with. There won't be anything more risky than maybe a few daskrends showing up." "We must have faith!" the preacher roared, his eyes wide with fervor. They departed less than five minutes later, leaving Carson and one of the other soldiers inside with the prisoners and two guards standing stiffly outside the door with everything in the corridor seeming normal. Hanlon took Wellesley, Borftein, and Lechat to a storeroom near the Communications Center where they could remain out of sight. Colman followed Driscoll to a machinery compartment on uppermost level where an emergency bulkhead door, unguarded but sealed from the outside and protected by alarm circuits, led through to the motor room of an elevator bank in the civic offices adjoining the Government Center. Colman traced, checked, and neutralized the alarms. Then he double-checked what he had done, and nodded to Driscoll, who was waiting by the door; Driscoll opened the latches and swung the door outward while Colman held his breath. The alarms remained inactive. Sirocco was waiting on the other side with Bernard Fallows, who was wearing engineer's coveralls and carrying a toolbox. "Go away," Chang told it.
