If she was honest with herself, was she deep down somewhere beginning to despise Howard for allowing it to happen? In the bargain that she had always assumed to be implicit, she had entrusted him with twenty years of her life, and now he was betraying that trust by allowing all that he had professed to stand for to be threatened by the very things that he had tacitly contracted to remove her from. Everywhere Terrans were rushing headlong to throw off 'everything that they had fought and struggled to preserve and carry with them across four light-years 'of space, and hurl themselves into Chironian ways. The Directorate, which in her mind meant Howard, was doing nothing to stop it. She had once read a quotation by a British visitor, Janet Shaw, to the Thirteen Colonies in 1763, who had remarked with some disapproval on the "most disgusting equality" that she had observed prevailing on all sides. It suited the present situation well.."Hey, guys, Goldilocks has got a new girlfriend Take a look. Is there something you wanna tell us, Colman? I've always had my doubts about you." The two corporals guffawed loudly, and one of them lurched against a table behind. The man sitting at it excused himself and left hurriedly. The Chironian scientists had not so much advanced past theft terrestrial counterparts; rather, as perhaps was not surprising in view of the absence on Chiron of traditional habits of thought or. authorities whose venerable opinions could not be challenged until after they were dead, they had gone off in a totally unexpected direction. And some of the things they had stumbled across on theft way had left Pernak astounded..Re turned back, shaking his head despairingly, and looked at Kath again. Now that Swyley had moved from the bar, her party manner had given way to something more intimate. Colman held her gaze as her gray-green eyes flickered over his face, calmly but searching, as if she were probing the thoughts within. He became acutely aware of the firm, rounded body beneath her clinging pink dress, of the hint of fragrance in her soft, tumbling hair, and the smoothness of the skin on her tanned, shapely arms. Deep down he had seen this coming all through the evening, but only now was he prepared to accept it consciously. All the reassurance he needed shone from her eyes, but the conditioning of a lifetime had erected a barrier that he was unable to break down. For a few seconds that seemed to last forever he felt as if he was in one of those dreams where he knew what he wanted to say and do, but his mouth and body were paralyzed. He knew it was a reflex triggered by ingrained habits of thought, but at the same time he was powerless to overcome it..Kath suggested a place in town called The Two Moons, which was where she and her friends usually went for entertainment and company, and was just the right distance for a refreshing walk on an evening like this. On the way they passed the house that Colman and his companions had stopped by earlier in the day, which prompted him to mention the painter's robot. "It looked as if it was learning the trade," Colman said..Air brakes squeal and sigh. The rumbling engine stops. Sinsemilla long ago chopped loose her family..Five minutes later the three Terrans rounded a comer and began following a footpath running beside a stream that would bring them to Adam's. They were deep in thought and had said little since bidding the painter farewell. After a short distance Jay slowed his pace and came to a halt, staring up at a group of tall Chironian trees standing on the far side of the stream alongside a number of familiar elms and maples that were evidently imported-genetically modified by the Kuan-yin's

It was Korean, from the thirteenth-century Koryo dynasty, and about fourteen inches high with a long neck that flowed into a bulbous body of celadon glaze delicately inlaid with mishima depicting a willow tree and symmetrical floral designs contained between decorative bands of a repeated foliose motif encircling the stem and base. His desk was a solid-walnut example of early nineteenth-century French rococo revival and the chair in which he was sitting, a matching piece by the same cabinetmaker. The books aligned on the shelves behind him included first editions by Henry James, Scott Fitzgerald, and Norman Mailer; the Matisse on the wall opposite was a print from an original preserved in the Mayflower II's vaults, and the lithographs beside it were by Rico Lebrun. And as Kalen's eyes feasted on the fine balance of detail and contrasts of hues, and his fingers traced the textures of the bottle's surface, he savored the feeling of a tiny fraction of a time and place that were long ago and far away coming back to life to be uniquely his for that brief, fleeting moment..After refilling the shoe, he puts down the juice container and sits on the edge of the bed to watch the dog."Oh, for goodness' sake, stop teasing the child," Geneva said. "You'll have to forgive me, Leilani. I've..he had them. Being Curtis Hammond requires a remarkable amount of energy..a lot longer in space than the few trips you've made.""I suppose so." "Very smoothly, considering that it's been twenty years." Bernard permitted a faint smile. "Jean's finding some things a bit strange, but I'm sure she'll get over it." "Ahem . . ." General Portney cleared his throat. "We will be posting guards around the Kuan-yin for the duration of the negotiations. I trust there will be no objections." The military officers stiffened as they waited for the response to the first implied challenge to the legitimacy of the Chironian administration of the Kuan-yin..in Colorado. Things had been so hectic that an opportunity for a few quick words with them had not presented itself since Colman's return. "Well, I see there's no need to ask how things went on your side, Steve. I take it that Veronica's in safe hands now."..Drinking the melted ice in the plastic tumbler, she swore off the second double shot of vodka that earlier."We haven't talked about that yet," Pernak told him.. "But it is not my desire to destroy without purpose valuable resources that it would ill-behoove any of us to squander. I have no need to bargain since I hold all the strength, but I am willing to bargain. In return for recognition and 'loyalty, I offer you the protection of that strength. But then, some of them can be very discreet. "My grandfather stayed alive in the Lean Years by ripping off Fed warehouses and selling the stuff. He could bomb any security routine ever dreamed up. My dad got a job with the Emergency Welfare Office, and between them they wrote two sisters and a brother that I never had into the system and collected the benefits. So life wasn't too bad." He shrugged, almost apologetically. "I guess it got to be kind of a tradition... sort of handed down in the family." "I knew you were suicidal."..The debate continued for some time, but Wellesley was still the Mission Direct6r and final authority, and in the end his views prevailed. "I'll go along with you, but I have to say I'm not happy about it," Borftein said. "A lot of them might be still kids, but there are nearly ten thousand first-generation and something like thirty thousand in all who have reached or are past their late teens--more than enough adults capable of causing trouble. We still need contingency plans based on our having to assume an active initiative." "Me, too," Micky agreed..unoccupied. He settled into the booth farthest from the door.. "The Chironians didn't kill Howard," Celia said. "I did." A silence descended like steel doors slamming down around the room. Those two simple words had

extinguished, all thoughts of the Kuan-yin, weapons, and antimatter instantly. Every head turned disbelievingly to Celia as she sat staring ahead. Lechat rose from his chair and walked slowly across to stand beside the table; after some hesitation the others followed one by one. Celia started talking just as Lechat was about to say something, her voice toneless and distant, and her eyes unmoving as if she were speaking to the cup in her hands. "I couldn't have spent my life with a man who had closed his mind to reality. You can't know what it was like. He had manufactured his own fantasy, and I was supposed to share it and help him sustain it. It was impossible." She paused to gulp some of the coffee. "So, the thing with Stern." "Stop," Micky said, dismayed to hear the word come out with a harsh edge. Then more softly: "Just. Hanlon made a throwing-away motion in the air. "Ah, this is all getting to be too serious for a Saturday night. Why are we talking like this at all? Are we letting silly rumors get to us?" He looked at Sirocco. "Our glasses are nearly empty, Your Honor. A round was part of the bet." "Probably this lemonade," said Leilani. Thus a quark or lepton was always three components or three anticomponents; mass followed as a consequence of there being no mixing of these within a triplet. Mixed combinations did not exhibit mass, and accounted for the vector particles mediating the basic forces—the gluon, the photon, the massless vector bosons, and the graviton. Doubt containing associates of the creative pair who were making modern art out of his car. GRAYFORD, THE plump, extravagantly dressed wife of Vice-Admiral Crawford, Slessor's second-in-command of the Mayflower H's crew, closed the box containing her new set of Chironian silver cutlery and added it to the pile of boxes on the table by her chair. Among other things the jumble included some exquisite jewelry, an inlaid chest of miniature, satin-lined drawers to accommodate them, a set of matching animal sculptures in something not unlike onyx, and a Chironian fur stole. "Where we'll end up living, I've no idea, but I'm sure these will enhance the surroundings wherever it is. Don't you think the silver is delightful? I'd never have thought that such unusual, modern styling could have such a feel of antique quality, would you? I must return to that place the next time I go down to Franklin. Some of the tableware there went with it perfectly." "She's real protective," the boy assures him. As the Chironian and his son climbed into the ground car on the street side, the woman's eyes met Colman's for an instant. There was no malice in them. "I know," she said through the window. "You've got a job that you have to do for a little while longer. Don't worry about it. We can use the vacation. We'll be back." Colman managed the shadow of a grin. Seconds later the truck moved away, the robot sitting in the rear, and the groundcar followed, two wistful. She pinches his cheek, and he senses that she would kiss it if she could crane her neck that far. "They don't have to make sense. All they have to do is say you're different. Now do you get it? Your dad belongs to a group who made a lot of rules that he never had anything to do with, and because he's wired the same as everybody else, he needs to feel he's accepted. To be accepted, he has to be seen to go by the rules. If he didn't he'd become a threat to the group, and they'd reject him. And nobody can take that. Look around and watch all the crazy things people get into just so they can feel they belong to something that matters."
